

For Immediate Release

The Worth County Environmental Health Department has used up the Grants to Counties which helped pay for Well Plugging, Well Rehabilitation, and the FREE water tests. Starting July 1st we will receive the grant again and will be able to provide the following services. We will conduct private water well test for FREE, reimburse up to \$200 for each well plugging, and also reimburse up to \$600 for a well renovation.

We can still perform private water well tests for a fee of \$17.

Also all new wells and septic systems need a permit before construction can start. The permit fee for a well is \$75 and a septic system is \$75.

The Environmental Health Department is located out at the Recycle Center located at 4125 Pheasant Avenue, Kensett. The phone number for any questions is (641) 845-2200.
